

# SE (IT314) Project presentation guidelines

## Important Note:

In case of mid-term review, whatever items listed in points 1-13 in the next two slides have been completed should be discussed depending on your project progress. That is all items are not compulsory for the mid-term review.

However, all items listed in 1-13 are compulsory to be presented and discussed during the final review. Missing items will be indicative of an incomplete software design.

# Content of Presentation

1. Context Diagram – 1 slide
2. Functional Summary (User Stories) : 1-2 slides
3. Top Level Use Case Model – 1-2 slides
4. Sequence and Activity Diagram for one of the most important use cases – 2-3 slides
5. Application Architecture – 1 slide

**Note:** Do not discuss common use cases like login, registration, etc. Take use case that are more specific to your problem domain.

# Content of Presentation

6. Technologies / Tools and Libraries – 1-2 slides
7. Detailed Class Diagram – 1 slide
8. Summary of Implementation – 1 slide
9. Deployment Diagram – 1 slide
10. Individual Contribution of each member – 1-2 slides
11. Gantt Chart for entire project – 1 slide
12. Application navigation using UI / UX design – 2-3 slides
13. Summary of Test plan – 1-2 slides

# General Guidelines

- Time Duration:
  - Mid-term review: 10 minutes + 5 minutes for question-answers.
  - Final review: 20 minutes + 10 minutes for question-answers.
- Do not use any fancy color that are difficult to read in your slides.
- Be very precise and specific in explaining your work during presentation.
- Every team member should participate in presentation.
- In-case of online presentations, the student speaker is requested to keep the video on!
